

HOTTEST NEW ITEM RELEASED AT THE 2008 PGA MERCHANDISE SHOW

Designed For Optimum Usability

The uPro uses state of the art technology to make it the most innovative and effective product of its kind. With features that are unparalleled for a golf GPS device, the uPro provides the avid golfer with aerial and satellite photography of the golf course coupled with GPS technology to clearly show golf course hazards, distance and the overall layout of each hole.

Graphics and text are crystal clear with a large 2.2" high resolution color screen that is easily viewable outdoors, even in direct sunlight. Patent pending SmartView™ technology automatically generates the proper views of the course based on your current location and updates those views appropriately as you move on the golf course. The sleek and unobtrusive design of the uPro can easily fit in a pocket or belt holder without interfering with the natural golf swing.

- Super fast GPS locking allows for the quickest startup time. High GPS sensitivity ensures that the uPro remains locked under the most extreme conditions.
- No need to install drivers or software. The uPro does not require additional software to connect with our servers to download golf courses. Users can easily download golf courses at nearly any computer with an internet connection.
- The high-resolution color screen combines up to date aerial and satellite imagery with GPS for the most accurate measurements and views of the golf course.

- Easy to understand graphics that display golf hazards such as sand traps and bunkers, as well as your current location on the golf course.
- Large 2.2 inch, high-resolution 320 x 240 color screen that is easy to view outdoors in bright sunlight.
- Through the use of SmartView™ technology, the uPro automatically presents dynamically generated "viewports," which show you information based on your next potential shot. As your position on the course changes, so does the view of the course.
- The uPro is thinner, sleeker, and lighter than any other product on the market. It fits easily in the pocket or on a belt without obstructing your swing.
- As an add-on software download, the device can accept voice commands to make menu navigation virtually hands free.
- Provides the user with a list of all golf courses in the U.S. The GPS technology programmed in the uPro provides an automatically sorted list of golf courses closest to the current location of the user.

Course Downloads. NOT Membership Plans

Course downloads are available to uPro owners by simply connecting the uPro device to a computer. Once it is connected to a computer, the user will be automatically directed to www.uprogps.com where courses all over the nation are listed and available for download on a click and buy basis.
